

Barwa Financial District, DOHA

Building Services - Mixed Use

Project: Barwa Financial District, Doha, Qatar

Client: Barwa

Contractor: Midmac Contracting

Distributor: Aspect London

Specification: Range of PN16 & PN25 **Hattersley** Valves

Hattersley will be supplying a range of high pressure valves to the Barwa Financial District in Doha, Qatar. The plot, in the West Bay commercial district of Doha city, measures 71,000m² and will consist of 9 high quality towers ranging from 21 to 52 storeys in height.

A full suite of PN16 commissioning, gate, globe and check valves are to be used on the low pressure system with PN25 requirements covering the high pressures associated with buildings of this height.

PN25 valves, from Hattersley, are ideal for skyscrapers that require the extra pressure for flow to reach the top floor. Along with extensive office space, to house the world's international and national banks, the district will also include a luxury hotel & spa, a state-of-the-art conference centre and lots of retail space.
