Project: M&S - Carmine Building, Paddington

Architect: Mossessian & Partners

HVAC Contractor: Imtech Meica

Distributor: BSS (Romford)

Specification: **Crane Fluid Systems** - Z3000 Dominators

Also known as 5 Merchant Square, the Carmine Building overlooks the canal which runs through Paddington and is part of a large area of regeneration in West London. Marks & Spencers has leased 7 of the 15 floors as additional office space as it sits adjacent to the retailers' current Waterside House headquarters.

The Crane Fluid Systems Dominator will provide heating, ventilation and air conditioning throughout the building. It is a compact prefabricated unit that combines a control valve, flow measurement device, bypass valves, strainer and drain, ready for simple and fast on-site connection to fan coils and other terminal units.

All the components are supplied as one tested unit with a known performance, which minimises specification risks and saves valuable time. For contractors, Imtech Meica, installation of Dominators provides significant reduction in site labour and installation costs because connection is fast and simple. There is a range of standard Dominator units available and units can also be tailor-made to suit specific needs.
