

St Pancras Renaissance Hotel, London

Building Services - Hotels & Leisure

Project: St Pancras Renaissance Hotel, London

Client: Marriott Hotels

Contractor: EMCOR UK

Distributor: BSS (Kings Cross) Ltd.

Specification: NABIC Fig. 500 High Lift Safety Valves

NABIC Figure 500 valves have been installed in the plant rooms of the new St Pancras Renaissance Hotel which opened in May 2011. The safety valves are connected to all of the buildings 5 boilers helping to provide hot water to taps throughout the hotel, which is 7 storeys high. The Fig. 500 is WRAS approved and designed for use on unvented hot water systems, where a high capacity, emergency steam relief capability is required.

The hotel, originally built as The Midland Grand Hotel in 1873, has been rejuvenated by the Marriott Hotel Chain and consists of 207 bedrooms, 38 suites, 9 meeting rooms, a restaurant, health club and spa. It also has direct access onto the concourse of the newly developed St Pancras Station.
