

ENERGY POLICY AND STATEMENT OF COMMITMENT 2017

Crane Building Services and Utilities (Crane BS&U) have set out to commit organisational resources to energy management for the purposes of reducing costs, minimising CO₂ emissions, minimising environmental impacts and where possible working towards using energy from sustainable sources in all of our operations and facilities throughout the world.

In order to support and meet the above, the company is committed to:

- ✓ Complying with the requirements of environmental legislation and approved codes of practice in all regions in which we operate;
- ✓ Continually seeking to improve our environmental and social performance;
- ✓ Reducing pollution, emissions and energy waste in all forms;
- ✓ Giving a high priority to energy management and investment in efficient energy drives and devices to continually reduce our energy demands;
- ✓ Monitoring energy use and targeting energy reductions in all facilities and operations;
- ✓ Identifying long-term investment in renewable energy sources;
- ✓ Creating and maintaining a network of energy champions in all sites for the purposes of raising awareness, encouraging participation and training employees in sustainable business practices.

This commitment is endorsed by the Group President and supported by Vice Presidents and Site Leaders in all facilities controlled and operated by Crane BS&U.

Richard Tuck
Group President
