1. CHANGE CONTROL

[illegible]

Issue	Date	Approver	Signed
1	02/10/26	Leigh Ollerenshaw	

2. Restriction of Hazardous Substances (RoHS) Compliance Policy

Crane BS&U is committed to ensuring that all electrical and electronic equipment (EEE) placed on the market by the company complies with all applicable requirements of:

- Directive 2011/65/EU on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS), as amended, including Directive (EU) 2015/863 ("RoHS 3").
- The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (SI 2012/3032), as amended, applicable within Great Britain.

3. Compliance Commitment

Crane BS&U maintains a documented compliance system designed to ensure that products within the scope of RoHS legislation do not exceed the permitted concentration limits for restricted substances in homogeneous materials, except where a valid legislative exemption applies. This includes control of:

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent Chromium (Cr VI)
- Polybrominated Biphenyls (PBB)
- Polybrominated Diphenyl Ethers (PBDE)
- Bis(2-ethylhexyl) Phthalate (DEHP)
- Butyl Benzyl Phthalate (BBP)
- Dibutyl Phthalate (DBP)
- Diisobutyl Phthalate (DIBP)

4. Technical Documentation and Technical Files

Where required by applicable legislation, Crane BS&U prepares, maintains and controls technical documentation sufficient to demonstrate compliance with RoHS requirements. Such documentation forms part of the product Technical File and may include:

- Product descriptions and specifications
- Bills of Materials (BOMs)
- Supplier declarations and material declarations
- Certificates of conformity
- Laboratory test reports where appropriate
- Risk assessments and compliance evaluations
- Records of applicable exemptions
- UK and/or EU Declarations of Conformity
- Evidence supporting conformity assessment activities

Technical documentation is prepared and maintained in accordance with the principles of EN IEC 63000:2018, the harmonised standard for the technical documentation required to demonstrate compliance with RoHS substance restrictions.

5. Ongoing Review and Verification

Crane BS&U operates an ongoing due diligence and review process to ensure continued compliance throughout the product lifecycle. This process includes:

1. Review of supplier compliance documentation during supplier approval and periodic supplier monitoring.
2. Verification of material declarations and certificates prior to product release.
3. Assessment of engineering changes, component substitutions and product modifications for RoHS impact.

4. Periodic review of technical files to ensure documentation remains complete, current and representative of the product configuration.
5. Monitoring changes to applicable legislation, exemptions and harmonised standards.
6. Retention of compliance records and technical documentation for the legally required period.
7. Corrective action processes where any non-conformance or compliance risk is identified.

6. Declaration of Technical File Availability

Crane BS&U confirms that, for products placed on the market within the scope of applicable RoHS legislation, all required technical documentation and supporting compliance evidence is maintained and available for review by relevant regulatory authorities upon justified request.

Crane BS&U further confirms that:

- Technical files are maintained for the legally required retention period.
- UK and/or EU Declarations of Conformity are available where required.
- Compliance assessments are conducted prior to placing applicable products on the market.
- Technical documentation is reviewed periodically through the Company's compliance management processes to ensure ongoing conformity with legislative requirements.
- Appropriate records are maintained to demonstrate due diligence in the control of restricted substances throughout the supply chain.

7. Responsibility

Responsibility for maintaining RoHS compliance rests with Crane BS&U's Quality Systems Manager under the Certificate Management Policy.

All affected departments are required to maintain records and cooperate in activities necessary to demonstrate continued compliance with applicable RoHS obligations.

8. Document Review Requirement

This statement shall be reviewed at least annually and whenever significant changes occur to applicable products, suppliers, manufacturing processes, legislation, exemptions, harmonised standards or conformity assessment requirements.
